

2018 GLAC AUSA Symposium

A Professional Development Forum
Hyatt Regency Huntington Beach Hotel
Huntington Beach, California
22 June 2018

“Space and the Network”

Overview / Objective

The Greater Los Angeles Chapter of the Association of the United States Army (GLAC AUSA) is hosting a multi-domain discussion with participation by USASMD/ARSTRAT, ARCYBER, the Army CIO/G-6 and AUSA National to analyze the nexus of space, cyber EW and the network. The purpose of this symposium is to facilitate a dialog on how to secure the ultimate high ground -- SPACE. The symposium will provide a forum for an open dialog between the Army, the established Defense Industry and non-traditional partners – including academia.

The first objective for the GLAC AUSA symposium will always be to host an event that has real value and merit. We want a symposium that looks at tough challenges and brings together the best and the brightest of government, industry and academia to discuss how we address those challenges.

It is our belief that this symposium can build on important discussions that began during the AUSA Global Force Symposium and Exposition in Huntsville, by narrowing the focus to **“Space and the Network”** we can aim for a deeper discussion in those key areas.

We are allowing plenty of time for each subject. The goal is to encourage interaction between the subject matter experts on the dais, a related panel of industry experts, and the audience.

Bring your best and your brightest people and ideas.

Please visit our website: www.ausaglac.info for the most information, to register on line and to book hotel rooms.
